So he was one of those mentally challenged freaks that think themselves as opposite gender from their physical gender ?
My my
Nope it's called I S or something
My God
However
What the hell was trhat?
Why be a woman all the sudden then ?
Nether? Seriously?

Excuse me ? You do not want to be treated?
総合病院

I've decided to live as I S proudly
No
But in your case hormone treatment isn't all about keeping you as a male
I understand how you are feeling
Do you know what will happen if you don't get treated ?
I S generally lacks hormones
Yes ?
osteoporosis and much faster aging

But
I understand that you want to l ve as you are and proudly
If you care about your fuuture
you must be treated
No way !
The treatment would allow me to keep a male's body and live smoothly as a male.
You need to receive male hormones

So cool that
You seemed happy

So

Maybe
Have you
gone insane ?
I
You made
me laugh !
If you can't
be neither
it's easier for
you to live as
a guy

Stop talking like a girl !
*In English, "I" is used for both male and females. In Japenese, "I" can be different for males and females.
IS NICE..
BUT I'D RATHER BE

When surfing, you were my hero !

H here
What was that? Funny
Come on He s try ng
I ve dec ded to try
If I don't want to become isolated, I will try and make them understand little by little

There s going to be a seminar for educational sex for married women soon
If you d like
Little by little
You know Ryoma
You can attend to the seminar and educate them about I S
Yes ?
s that isn't it one every two thousand ?
it seems quite high chance
Some mothers might be
The reason I am asking you to do
If it s too much for you though
neverm nd
But f you like
Interested in hearing it

I want you to teach us about I S
I will try
who had lost his male gender organ due to failed phimosectomy
There was a baby in America
I will have to try
This is a real case
At that time... artificial penis didn't exit
It happened when he was seven months old

But the child had always peed while standing
The child had received to be a female and was raised as a female Truth was kept secret for the baby
and always played with boys.
and her behavior was like other boys
and started her life as male again
In the end she had received yet another gender change treatment

Just like our body
Our mind has gender as well
Try
In my body there are both male and female
And differences between males and females are rather large
and in my mind
there are also male and female

But f you ask me wh ch s de I feel more comfortable wth
my answer would be female
my m nd s neither male or female either
My body s neither really a male or a female
and
t s obv ous for me
As a ch ld I ve always loved play ng wth dolls
I talked l ke a g rl
and I enjoyed play ng wth g rls
and I acted l ke a g rl

Everything
I enjoyed
was denied

It was painful

But I just
want to be
what I feel
like to be
That s
Man to
woman
I understand
that it may sound
ridiculous to
you

That is all I want to accomplish.
The seminar
was very successful
That was what I believed so
Like this one step and then another

JanmeS

that it wouldn't be easy

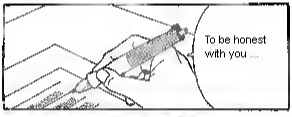
You want to be treated with female hormone?
Yes
I read on Internet that
Hormones nject on doesn't have to be followed by phys cal gender

your body will be ...
I am aware
If you rece ve female hormone
But
In another word, I can be treated with female hormone.
If you ask me
wh ch one I d want
It w ll be more fem n ne than now
But
It s female

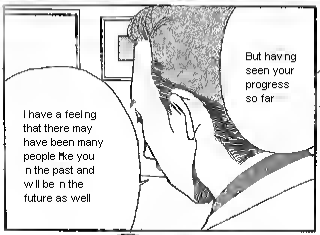
It can be very dangerous
But
You are legally a male on paper
You can't just rece ve female hormone just because you want
Besdes your med cal nsurance w ll not be able to cover the cost f you want female hormone
The cost sn't cheap..m nd you
You w ll have to cover the cost from your own wallet
For your entre l fe
But

No
I do not
want to
Even so do I have
to l ve as a male ?
My body keeps
lean ng to female
s de slowly
as well as
my m nd
I do not beleve I w ll
ach eve any k nd of
happ ness f I choose
to be male now
I see



To be honest with you ...

I will send you to a specialized doctor.



But having seen your progress so far
I have a feeling that there may have been many people like you in the past and will be in the future as well

I don't really know what is right or wrong for you

I hope so
more people will be educated about IS
and medical insurance will also cover such cost involved with them
I just hope that
Yes
